DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on 2/10/2011 is acknowledged. The traversal is on the ground(s) that the restriction is improper because of the novelty of the specific conjugates of the claims 1-9 and 12-7. This is not found persuasive because of reasons of record. However, the all the claims are examined to the extent that they read on the elected subject matter of

Group 1, claim(s) 1-10, 12-17, drawn to methotrexate-hyaluronic acid conjugate of formulae I' and II'. (i.e., formulae of claim 6).

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-17 are examined to the extent that they read on the compounds I' and II".

Claims 1-17 contain non-elected subject matter.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims

Art Unit: 1625

are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-17 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 7807675. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '675 overlap and encompass the instantly claimed compounds.
